

Yahya Firdaus, S. Kom.

I hold a degree in Computer Science from Universitas Pendidikan Indonesia and possess extensive experience in Back End development. My areas of interest include Natural Language Processing (NLP) and Data Engineering. I have advanced proficiency in various programming languages including PHP, Python, Java, Javascript, Go, and C#, along with expertise in frameworks such as Laravel, Echo, Next.js, ASP .NET, Django, and Flask. Throughout my career, I have collaborated effectively with diverse teams and demonstrated adaptability across various roles, both in team settings and independently. I am highly motivated by continuous learning and exploring new opportunities for growth.
