

Yahya Firdaus, S. Kom.

I am a graduate of the Computer Science program at the Universitas Pendidikan Indonesia. I have several years of experience in Back End development. I have an interest in NLP and Data Engineering. I am proficient in programming languages such as PHP, Python, Java, Javascript, Go, and C#, as well as several frameworks including Laravel, Echo, Django, and Flask. In my experience, I have had the opportunity to work with many people and adapt easily to different roles, whether as part of a team or individually. I enjoy learning new things.
